GEO-CACHE

Geo-caching is an outdoor activity in which the participants use a Global Positioning System (GPS) receiver to hide and seek containers (called "geo-caches" or "caches"). A typical cache is a container containing a log-book and/or items for trading (we suggest company-branded products or trinkets). Geo-caching is most often described as a game of high-tech hide and seek.

Join the fun of a high-tech, treasure hunt on 55-acres of a scenic estate.

Geo-caching is a fun group activity fostering a strong sense of community and support for the environment. Or you can gear the caches toward your business whether it is a product launch or guiding principles.

What's Included:

GPS receivers

Bandanas

Containers

How it Works:

The group has the option of a 10 to 20 clue hunt depending upon time allowed for the event. The group is divided into teams and each team will receive a team color, bandana and GPS receiver. Once the teams are divided, the facilitator will ask for team captains. The facilitator will meet with the captains to discuss the rules.

Then, the captains are responsible for repeating the instructions to their respective team members. The teams may want to divide the responsibilities for the hunt: guide, scribe, navigator, organizer, and riddle master. Each team starts with a waypoint, a marked location on the property, and the receiver only gets you within about 15-20 meters away from the marked waypoint. The cache is hidden from geo-cachers to increase the challenge and fun and team members work together to solve the caches clues. As they solve their caches, team members make notes of the places and items they have found at each waypoint. The first team back at the start with the most correct caches wins!

Once that person is blindfolded the rest of the members will be given an object to observe. The ultimate goal is to describe this object in precise detail to the drawer so they can then draw this object on paper blindfolded. Each team will compete to have the best replicated drawing of the object they were given. They will be judged by are how similar the replicated drawing is to the object, and how fast they are able to complete this task. This requires team members to practice high-quality communication skills with one another and work together as a team to be the winners of this task.

This activity is a good one to get people mingling and communicating. Each participant will use a checklist as they walk around the room trying to find a person who has a certain characteristic. The goal is to meet and talk to as many people as possible within the time limit in order to put one name by each of the characteristics.
